Priority Number: 1994-02-28 JP1994000029688

Abstract: PURPOSE: To produce a high-quality polyester hollow fiber having a unique milky gloss unlike the conventional fiber, excellent in lightweight properties, heat insulating properties, dry touch and opacifying properties and resistive to collapse of the fiber cross section.

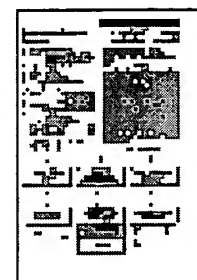

CONSTITUTION: This polyester hollow fiber is made of a polyester containing a delustering agent in an amount of  $\geq 1.5\text{wt.}\%$  and  $\leq 8.0\text{wt.}\%$  and the outer shape of the cross section is circular. The cross section has a triangular hollow part in the central part and the thinnest part of the layer except the hollow part has a thickness (NA) satisfying the following formula. The percentage of hollowness of the hollow part is 10 to 50%. That is the characteristic of this polyester hollow fiber having a milky gloss.  $NA (\mu) \geq 2.1 \times d1/2$ .
